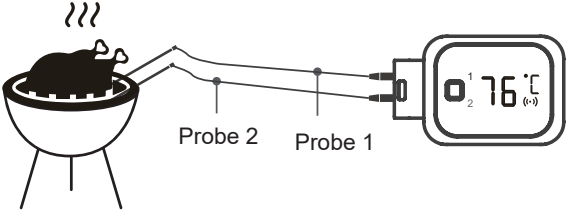
Install the probes

The device will keep scanning the sockets when its power is switched on, the Probe Indicators will blink one by one from 1 to 2 where probes are plugged in.
Then insert the probes into the food, make sure the front tip of the probe is in the center of the food to get accurate temperature.



Pair with your phone

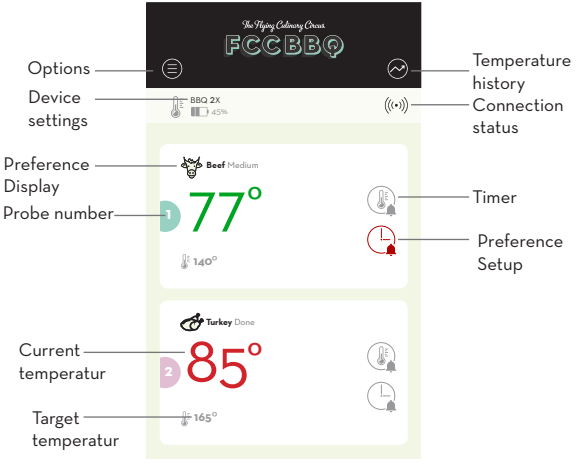
	Bluetooth Indicator
1. Press and hold the power button on the device for 3 seconds to power it on.	No icon
2. Keep the bluetooth connection on the phone activated.	
3. Launch the app, and follow the instructions in the app to pair and activate the device.	Icon blinking
4. Connected successfully.	Icon fixed

Once paired the device with your phone, you don't need to do it again, unless you change to other phones.

Enjoy your barbecue time

Choose the food type and preference for the food where each probe is inserted, the app and the device will display its current and target temperature.

When the food is ready, the app and the device will alarm.



The user interface of the app may be changed when upgraded. Please follow the instructions in the app.
